

Producer Compliance Scheme

QUOTATION FORM

Please complete Steps 1 & 2 as applicable and return to us. Boxes outlined in green will then be completed by PV CYCLE UK and returned to you providing a full quotation.

Return form to info@pvcycle.org.uk.

STEP 1 - COMPANY DETAILS

Registered Company Name:

Company Registration Number:

If you are not a registered company, are you a:

Partnership

Sole Trader (please tick)

Contact Name:

Contact Email Address:

Telephone Number:

Total Turnover (as related to the latest published accounts):

Are you VAT registered?

Yes

No (please tick)

STEP 2 – PRODUCT INFORMATION

Please provide the total weight, in kilograms, of PV panels (and any other product types such as inverters, and batteries) placed onto the UK market within the previous calendar year.

PRODUCT TYPE	TOTAL WEIGHT (KILOGRAMS)
PV Panels	
Inverters	
Batteries (& Accumulators)	
Other EEE, (please select from categories below):	
Large Appliances	
Small Appliances	
Display Equipment	
Cooling & Refrigeration	
Lamps (LED, Gas Discharge)	
TOTAL WEIGHT (Kg)	

Based on your product information your annual
Membership Fee will be: £ + VAT

Please note: That for B2C WEEE there will be a recycling contribution based upon the member's market share in the UK. This is explained below:

B2C market share charges

While a PV panel placed on the UK market is classified and to be declared by Producers as a B2C WEEE equipment product, PV panels are discarded through different collection channels according to the type of installation.

Quantities which can be considered of a household origin and below 20 PV Panels are collected are collected through the PV CYCLE Dedicated Collection Facilities (DCF) and are charged according to a Market Share Calculation.

The Distributor (retailer) of this type of EEE has an obligation to take-back discarded PV Panels when the amount is below 20 pieces. Distributors can discharge this obligation, and assure their customers of a sustainable collection and recycling system, by joining the PV CYCLE Distributor Take-Back Scheme (DTS) that has a network of collection facilities at which household PV panels can be deposited. To joining the PV CYCLE DTS please visit our website: <http://dts.pvcycle.org.uk/registration/> PV CYCLE will collect WEEE from these Dedicated Collection Facilities (DCFs) and other Distributor collection points free of charge. Any PV WEEE collected from Distributors or DCFs is deemed to be household WEEE.

The Market Share Calculation is assessed as follows: $(A \div B) \times C$ where:

“A” is the total amount in tonnes of EEE intended for use by private households and falling within one of the categories of EEE that has been placed on the UK market by that Member in a particular compliance period, or part of a particular compliance period;

“B” is the total amount in tonnes of EEE intended for use by private households and falling within the relevant category that has been put on the UK market by all producers in the same compliance period; and

“C” is the total amount in tonnes of WEEE from private households that fall within the relevant category collected from DCF and other household WEEE to be financed by Producers in that category in the Compliance Period used in ‘A’ (the Collection Target)

For example a member places 100 tonnes of PV EEE on the market.
The industry places, say, 10,000 tonnes of PV EEE on the UK market
120 tonnes of PV WEEE is the collection target

The member obligation = $(100 \div 10,000) \times 120 = 1.2$ tonnes and this is the amount of WEEE that the member will be required to finance. The fees are in principal invoiced on a quarterly basis.

Collection costs for > 20 PV panels arising from professional installations

Other PV Panel WEEE arising outside the DTS, shall be collected directly from locations where the waste is generated and billed at cost and paid individually by the waste holder directly or by the producer when the producer agrees to pay for this on behalf of the waste holder. This decision is a commercial decision and agreement between the Producer and the waste holder.

PV CYCLE can offer you a full waste management service for the collection and treatment of discarded PV Panels WEEE. You can contact PVCYCLE for a quotation by email to: operations@pvcycle.org

STEP 3 - QUOTATION

Thank you for the information you have provided. Please find below a summary of the fees to register as a Producer and to become a member of PV CYCLE UK based on the information supplied.

Return to info@pvcycle.org.uk. _____

FEE TYPE	FEE	FEE (INCL. VAT)
One off Joining Fee		
Estimated B2C Recycling Contribution Charge		TBA quarterly
Annual Membership Fee		
Annual Environmental Agency Registration fee (VAT not applicable)		£
Total to pay		£
